OUTSTANDING SERVICE FOR OVER 35 YEARS

At Q4 Bathrooms, we have been delivering quality bathroom products to showrooms and trade counters for over three decades.

We listen carefully to our customers. We understand their business, and go out of our way to provide excellent pre-sales and after-sales support.

It's what makes us one of the leading bathroom distributors in the UK today.

WE CONSISTENTLY DELIVER THE GOODS

Our many years in business has led to an extremely reliable and consistent level of service.

Using our very own fleet of vehicles and Q4 delivery drivers, we travel to all areas of the UK and offer next day delivery on all orders placed before 5pm.

From placing your order to picking and delivering it, our honed systems and procedures ensure your orders are exactly how you'd like them.

Next-day delivery

We understand that bathroom traders need to place orders when it's most convenient. By extending our order cut off point to 5pm we are still able to deliver the next day.

Everything's triple-checked

To ensure traders receive their bathrooms exactly as they've ordered them, we check, and recheck every order picked.

99% complete and correct

Our 'triple check' policy means that our logistics team consistently achieve completed order ratings of 99%.

Central UK base

Located on the outskirts of Wetherby, between Leeds and York, our central UK location and close proximity to major roadways ensures our orders get to our customers, fast.

Our own delivery fleet

We employ our very own fleet of vehicles and Q4 delivery drivers to ensure we are able to guarantee the very best, reliable delivery service.

First-class aftercare

Our focus on our customers doesn't end when their order had been received and paid for. The value we place on our customers is reflected in our highly praised after care service.

Any normal stain, superficial burn, graffiti or marker pen stain can be removed, immediately returning the surface to its original appearance by following the recommended cleaning instructions

Resistant to germs & bacteria. Does not allow the proliferation of germs and bacteria. KRION™ does not allow bacteria or fungi to grow or spread. This is an intrinsic property of the composition of the material, without the need for additives to achieve this permanent effect.

KRION™ offers a degree of whiteness over 99.8%, which in combination with its high refraction index provides a pure, brilliant white that is unique among existing solid surfaces.

This material is made of two-thirds natural minerals (ATH - aluminium trihydride) and a low percentage of high-resistance resins.

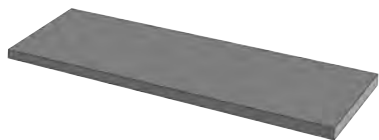

KRION™ is an eco-friendly material, being made up of two thirds natural minerals. Other aspects which make it an environmentally friendly material are that it does not emit volatile organic compounds, and is easy to repair as it can be restored to its original appearance. This reduces the need for replacement, thereby complying with the durability requirements outlined in international environmental guidelines.

TOILET GUIDE

Close Coupled / Open Back

The most common type of toilet sold in the UK, the Close Coupled / Open Back is a floor standing toilet where the cistern is fitted to the back of the pan.

The cistern comes with Dual flush activation and the open back pan is designed to allow for soil pipes that come out at a right angle to the left or right. It is also suitable for soil pipes that go straight out through the wall or into the floor (space depending).

•	•	•	•

See from page 214.

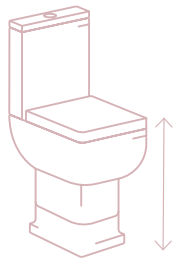

Close Coupled / Flush Fit

Like the Close Coupled / Open Back this is a floor standing toilet where the cistern is fitted to the back of the pan. With Dual flush activation, the pan fits flush against the wall concealing any pipe work leaving a tidier finish. This does however mean that the toilet can only be fitted with the soil pipe going straight out through the wall or into the floor (space depending).

See from page 218.

Close Coupled / Extra Height

Again the Extra Height Close Coupled toilet is floor standing and the cistern is fitted to the back of the pan with Dual Flush activation. These toilets benefit from a higher seating position than a normal toilet, aiding less abled individuals and making them more comfortable for taller users.

Check each individual toilet depending on flush or normal fit.

See from page 220.

Back to Wall

The back to wall pan is floor mounted, designed to fit flush against furniture and be used with a concealed cistern that is situated in the furniture. The toilet can also be fitted against a wall if fitting the concealed cistern inside the wall is a possibility. Soil pipes can be sent left or right and straight out of the wall if installing furniture which will hide the pipework.

Back to Wall / Extra Height

Like the Back to wall pan, this is floor standing toilet, designed to fit flush against a furniture unit with a concealed cistern. The Again the toilet can be fitted against a wall if fitting the concealed cistern inside the wall is a possibility. These toilets benefit from a higher seating position than a normal toilet, aiding less abled individuals and making them more comfortable for taller users. Soil pipes can be sent left or right and straight out of the wall if installing furniture which will hide the pipework.

Wall Hung

The wall hung pan is designed to fit on a Wall Hung Frame system which allows the toilet to sit clear of the floor. To fit a wall hung pan you need to be able to fit a frame system inside your wall cavity or box out to allow for the frame. The frame usually comes with a cistern and flush plate and an option of soil pipe connector meaning you have flexibility on where your waste pipe goes.

carron

In 1759, the original Carron Company formed the now famous ironworks on the banks of the River Carron. The company rode the wave of the Industrial Revolution and was famed for their short-barrelled naval cannons, Carronades, used by the Royal Navy up until the 1850's.

The name for baths

As times changed the Carron Company moved into the production of everyday products and before long, the Carron Company began to manufacture sinks and baths but as the market changed and the original Carron Company came to a close, Carron Bathrooms was formed. Since then, we have been at the forefront of modern bath design and can be relied on to produce baths with skill and precision, never losing sight of what makes our baths great, craftsmanship.

Hand crafted process

All our baths go through an eight-stage process before leaving the factory floor. From moulding to packaging, every stage is monitored and finished by hand. This leaves us so confident in our products that we offer a minimum 20-year guarantee on every Carron bath.

Carron's unique triple-layer reinforcement system

The **carronite**TM experience

CarroniteTM was created by Carron Bathrooms to provide a higher level of comfort, luxury and peace of mind for our customers.

All Carron Bathrooms baths are hand finished to our exacting standards but only CarroniteTM baths, with our unique, patented, triple-layer reinforcement system come with a 30 year guarantee - proof of the confidence we have in CarroniteTM.

How does it work

CarroniteTM baths are stronger and heavier than standard acrylic baths. The additional finishing layers crafted during the CarroniteTM process create a uniquely reinforced product. The added weight requires a bespoke fitting system that only adds to the stability and rigid feel of our CarroniteTM baths. These elements combined help deliver the CarroniteTM experience.

- ① **THE FINISH:** Specially formulated, our unique CarroniteTM finish results in increased rigidity while the density of the material allows greater heat retaining properties.
- ② **THE FRAME:** Created specifically for the CarroniteTM Baseboard, this unique frame, and foot set uses the added weight and thickness of our baths to deliver additional stability and security.
- ③ **THE BASEBOARD:** Custom baseboards, cut to size for each CarroniteTM model, are applied by hand before the CarroniteTM finish is applied.

 **carronite**TM

The lowest profile jet system in the world

Technology

Every aspect of C-lenda technology has been designed with the bather in mind. From the smooth, easily adjustable controls, the invigorating jet massage performance through to the super safe suction system, you can be assured you will get the comfort, style, performance and protection you deserve from C-lenda.

The intelligence of the C-lenda flush jet system lies within the patented mounting flange. Manufactured from high grade stainless steel this unique patented load transfer device ensures the fittings are securely mounted to eliminate cracking and peeling, which prolongs the quality and beauty of your C-lenda flush jet system.

Hydrotherapy

C-lenda's whirlpool system delivers a rich hydrotherapeutic experience. The consistent pressure of the warm water against the skin encourages blood vessels and capillaries to open, enabling a higher volume of oxygen-rich blood to the extremities. The heat transfer also has a sedative effect on the nerve endings, reducing muscular pain and discomfort.

The massaging effect of the jets reduces oedema (fluid swelling) around the joints. They also stimulate the nerve ending receptors, distracting the pain-carrying nerves from passing their pain-inflicting messages to the brain. Endorphins are then released leaving the body in a state of well-being.

WALL PANELS

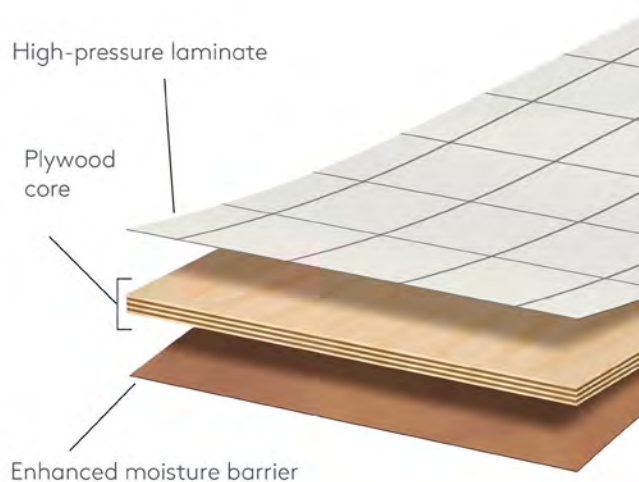

Fibo

Designed and manufactured in Norway. Our waterproof wall panels are designed to make installation easy and efficient. The wall system can be installed 5 time faster than tiles, and panels can be attached to timber frame, tiles or plasterboard.

Fibo wall panels, come with a unique Aqualock 'click-lock' system that provides a 100% waterproof surface when used in conjunction with an approved sealant, making the job quick and easy, the joints virtually invisible.

Our waterproof wall panels have now been verified to be anti-bacterial. All our surfaces have been thoroughly tested at an independent laboratory in accordance with ISO 22196:2011
